

## The iQ<sup>®</sup> Nasal Mask

### Make the Smart Choice with a Sleepnet iQ Mask

With the iQ's unobtrusive design, comfort takes on a whole new meaning. Unique in the industry for its flexibility, you can gently shape the iQ's soft shell for a customizable fit in seconds. The patented SoftGel rests directly on your skin. Discover the difference of innovative design and high quality materials; discover the softest masks in the world.

- **Soft gel rests directly on the skin for maximum comfort**
- **Moldable shell allows for a semi-customizable fit**
- **Lightweight breathable composite headgear**
- **Clear field of vision for easy adjustment**

- FDA approved
- Easy, semi-customizable fit
- Designed and built in the USA
- Does not contain any natural rubber latex

"Sleepnet iQ mask is superb! Before the iQ, my other CPAP masks were so uncomfortable to wear that I'd often throw them off in the middle of the night. Other times I'd wake up with raccoon marks on my face. Neither happens with the iQ mask because its gel seal (which fits against my face) is softer than my skin and is extremely comfortable to wear. I finally get a decent night's sleep!" - Don Holland from Longmeadow, MA

"I couldn't imagine being without (my Sleepnet iQ mask). The ease of use, comfort and good sleep the mask has allowed me to have for nearly 10 years has been a real factor to my well being. The headgear attachments make putting the mask on and taking it off easy, the gel feeling is so comfortable, and the ease of adjusting the nose fit (by bending the metal strip embedded in the frame) is a real plus. What a difference a good night's sleep makes! Thanks for your help!" - Najeeb Loftey from Portland, ME
